

SAFE & SECURE

Security Exchange

A core member of the Chelsea Group Security & Crisis Management Division, Security Exchange is dedicated to the provision of specialist consultancy on a worldwide basis, supporting corporate, private client, affinity and insurance markets through effective contingency planning, the provision of security information, crisis management and 24/7 response.

In order to offer our clients the very best in personal security, especially those exposed to the threat of kidnap, Security Exchange has developed 'Safe & Secure', a comprehensive personal protection package designed for the executive traveller or high net worth family member.

The threat of kidnapping is increasing across the world; high net worth individuals and senior executives are no longer the only groups targeted by kidnapers. Across Latin America and Africa, individuals from middle and lower-income sectors of society are often finding themselves victims of kidnapping. At the same time terrorist groups such as the Islamic State (IS) and al-Qaeda (AQ) are using kidnappings to finance militant operations and for political propaganda.

Our Experience

Security Exchange consultants have extensive experience in the field of kidnap prevention and

response; and are based throughout the three main geographical hubs: Europe, Asia-Pacific and the Americas. Our consultants are well versed in the local cultures and are fluent in the relevant languages, thereby ensuring a high degree of expertise and communication when dealing with any incident.

The 'Safe & Secure' team also offers expert help in the related specialist support services: crisis management; crisis communications; government and law enforcement liaison; and trauma management, thereby ensuring not only a professional response to any incident but also a full post-incident recovery programme which will expedite the swift repatriation and rehabilitation of the kidnap victim.

24-hour Emergency Response

The 'Safe & Secure' service offers our clients a 24/7, multilingual emergency response facility across the three principal time zones: Europe, the Americas and Asia-Pacific. With just one telephone call, skilled operators will alert our global response teams and have a specialist consultant on the ground within 24 hours.

CHELSEA
GROUP

SAFE & SECURE SPECIALIST SUPPORT SERVICES

Personal Profiling

Skilled profilers will compile confidential data files which can be used in the event of a kidnap to help identify the victim, provide urgent medical support if necessary, and facilitate communications between the victim and their families, thereby accelerating their release.

Kidnap Avoidance

The 'Safe & Secure' programme can provide specialist anti-kidnap and hostage survival training for individuals, their staff and families, thereby reducing the risk of kidnap and imparting potentially life-saving skills to those at risk.

Online Security Risk Information

The 'Safe & Secure' package includes access to the InTouch online service which offers our clients a range of country risk profiles, essential security tips and a 24/7 enquiry facility to answer any security concerns they may have.

Crisis Management Team Support

In the event of an incident, Security Exchange consultants will assist in the selection and training of members of the crisis management team (or family negotiation unit). They will also help with crisis communications, especially where the media are involved, and co-ordinate liaison with the relevant government or law enforcement agencies, if appropriate.
