Europe

Belgium 01-31 December 2020: The Belgium Federal Agency for the Safety of the Food Chain (AFSCA), in conjunction with multiple companies, is in the process of identifying and recalling numerous products following analysis of batches of sesame seeds imported from India which showed that the maximum residual limit for a **chemical** agent, ethylene oxide had been exceeded. The use of this substance as a plant pesticide is not authorised in Europe. A risk assessment was subsequently performed indicating a potential chronic risk to consumer health if the products in question are consumed regularly and in large quantities, prompting multiple recall/withdrawals. The AFSCA has informed the Health Authorities of other Member States via the RASFF system. A full list of recalled items containing the implicated sesame seeds can be found [here](#)>

France 01-31 December 2020: French health authorities were informed by their Belgian counterparts via the Rapid Alert System for Food and Feed (RASFF) of the presence of a **chemical** agent, ethylene oxide, at a level above the

maximum regulatory limit in certain batches of imported sesame seeds in September 2020. Investigations are still ongoing to identify the exact origin of this contamination. Pending the results of these investigations, the French Health Authorities, in coordination with their counterparts in the Member States concerned, have taken measures to withdraw / recall a significant amount of contaminated products. A full list of recalled items containing the implicated sesame seeds can be found [here](#)>

Germany 01-31 December 2020: A full list of recalled items containing the implicated sesame seeds can be found [here](#)>

RASFF: Due to ongoing investigations into identifying both the initial risk posed and products affected, information on the decision to recall/withdrawal was only made available recently. Given the complexities of navigating a multinational and/or systematic recall; where a single ingredient in a 'finished product' is deemed to be unsafe, resulting in additional products being recalled, please contact us on +44 (0)1491 683710 to speak to one of our Product Recall consultants.

France 31 December 2020: La Salaison du Mont Pilat recalled specific best before dates of Salaisonniers du Pilat brand Saucisse droite (dried dried sausage) due to the presence of a **microbiological** agent (Listeria monocytogenes).
