## Outbreaks

## Recall Summary

**Belgium 01-31 May 2022:** Since late 2020, the Belgium Federal Agency for the Safety of the Food Chain (AFSCA), in conjunction with multiple companies, have been recalling numerous products containing sesame seeds imported from India which were found to exceed the maximum residual limit of a plant pesticide, ethylene oxide. The use of this substance as a plant pesticide is not authorised in Europe. Since then, the recalls have been extended to other spice-type products for the same reason. All full list of all recalled items can be found [here>](#)

**France 01-31 May 2022:** French health authorities were informed by their Belgian counterparts via the Rapid Alert System for Food and Feed (RASFF) of the presence of a chemical agent, ethylene oxide, at a level above the maximum regulatory limit in certain batches of imported sesame seeds in September 2020. DGCCRF checks have since shown that other products (psyllium, spices, etc.) were also likely to be contaminated. A full list of recalled items containing the implicated sesame seeds can be found [here>](#)

Given the complexities of navigating a multinational and/or systematic recall; where a single ingredient in a 'finished product' is deemed to be unsafe, resulting in additional products being recalled, please contact us on +44 (0)1491 683710 to speak to one of our Product Recall consultants.

**United Kingdom 31 May 2022:** Co-op recalled specific best before dates of Co-op Tuna Chunks in Sunflower Oil and Co-op Tuna Chunks in Springwater due to the possible presence of **extraneous material** (metal).
